There are lots of videos of **giant** pandas posted on social media! Some years ago, giant pandas were put in danger. Much of their habitat was destroyed to build new homes. Their habitat wasn't protected. Pandas only eat bamboo, which was cut down for the houses.

Many people were very worried, so the pandas were put into special areas, where they were protected. They were given as much bamboo as they could eat. In the 1980s, there were only around 1,200 giant pandas. Now there are almost 2,000! This number shows us something important. When we try very hard, we can help to protect animals.
